

Test Plan — OrangeHRM Login Module

Version: 1.0
Date: June 29, 2026
Prepared by: Pragyan Ghimire
Tool: Jira + Xray

1. Objective

To validate the login functionality of OrangeHRM web application ensuring correct authentication behavior, input validation, security, and user session management.

2. Scope

 In Scope

- Login form functionality
- Input field validations
- Error message verification
- Session and logout behavior
- Security testing on login field
- Alternative login methods
- Forgot password flow

 Out of Scope

- Dashboard modules (HR, Leave, Payroll)
 - Admin panel configurations
 - Mobile responsiveness
-

3. Test Environment

Parameter	Details
Application	OrangeHRM Demo
URL	https://opensource-demo.orangehrmlive.com
Browser	Chrome (latest)

OS	Windows 10/11
Test Type	Manual
Tool	Jira + Xray
Credentials	Admin / admin123

4. Test Cases Included

TC ID	Test Case	Type	Priority
TC-2	Verify login with valid credentials	Functional, Smoke	Highest
TC-4	Empty username shows error message	Functional	High
TC-5	Empty password shows error message	Functional	High
TC-6	Empty username & password shows error	Functional	High
TC-7	Invalid password shows error message	Functional	High
TC-8	SQL injection on login field	Security	Highest
TC-9	Case sensitivity test	Functional	Medium
TC-10	User cannot access dashboard after logout	Functional	High
TC-12	Alternative login method	Functional	Medium
TC-13	Forgot password flow	Functional	High

5. Test Execution Approach

Phase 1 — Smoke Testing
→ TC-2 (Valid login — app working?)

Phase 2 — Functional Testing
→ TC-4, TC-5, TC-6, TC-7 (Validations)
→ TC-9 (Case sensitivity)
→ TC-10 (Session/logout)
→ TC-12 (Alternative login)
→ TC-13 (Forgot password)

Phase 3 — Security Testing
→ TC-8 (SQL Injection)

Phase 4 — Regression (if any fix is made)

→ Re-run all above TC's

6. Entry & Exit Criteria

Entry Criteria (When to START testing)

- OrangeHRM demo site is accessible
- All test cases are written and reviewed in Xray
- Test environment is set up and verified
- Login credentials are confirmed working

Exit Criteria (When to STOP testing)

- All 10 test cases executed
 - All bugs reported in Jira with screenshots
 - No critical/highest priority bugs open
 - Test Summary Report is prepared
-

7. Risk & Mitigation

Risk	Mitigation
Demo site goes down	Re-test next day / use local OrangeHRM setup
Credentials change on demo	Reset or use fresh demo credentials
SQL injection crashes demo	Document and move on, expected on demo
Forgot password email not received	Note limitation of demo environment

8. Deliverables

Test Plan (this document)

10 Test Cases in Jira Xray

Bug Reports with screenshots in Jira

Test Execution tickets in Xray

Test Summary Report (after execution)

9. Bug Reporting Format

Every bug found should be logged in Jira with:

Title : Clear one-line description

Priority : Highest / High / Medium / Low

Severity : Critical / Major / Minor / Trivial

Steps : Numbered reproduction steps

Expected : What should happen

Actual : What actually happened

Attachment : Screenshot with URL visible

Environment : Browser, OS, URL

10. Test Summary (To Fill After Execution)

Metric	Count
Total Test Cases	10
Executed	10
Passed	7
Failed	3
Bugs Found	2
